

Working Hours Utilities

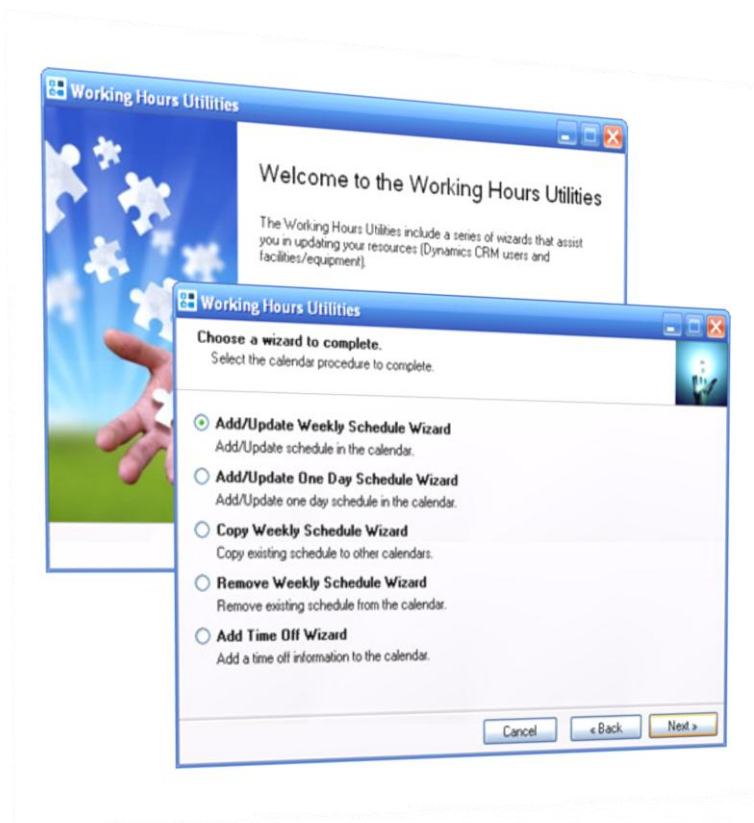

for Microsoft Dynamics CRM 4.0

Working Hours Utilities

If your Company is thinking about changing to new Shift patterns – DPS Working Hours Utilities is what you need. Working Hours Utilities is a set of intuitive wizards that help maintain your company resources.

With Working Hours Utilities adding new Weekly Schedule to your resources calendars, modifying existing ones or copying Weekly Schedule across your organization becomes an easy and quick process. And what is the most important the utilities work in bulk mode; it simply means that you can perform any action on a range or even all resources (user and equipment/facilities) with just one click!

Use Working Hours Utilities to:

- Add/Update Weekly Schedule for a range of your resources
- Add/Update One Day Schedule for a range of resources
- Copy Weekly Schedule from one calendar to another
- Remove Weekly Schedule from Microsoft Dynamics CRM
- Add Time Off information to your resources calendars
