Introduction

This section contains a list of the supported databases and operating environments for Price List Utilities module, as well as the recommended system requirements for servers and client computers.

Price List Utilities Overview

Price List Utilities is an add-on application specially designed for Dynamics 365. With its intuitive wizard driven interface you will be able to:

- add new price lists items to multiple products
- update pricing information globally (by percentage or fixed amount)
- copy price lists items from one product to multiple products
- copy price list items from a selected price list to multiple price lists
- remove price lists items
- export price list items to a file which can be used later as a source for import
- import or update price lists items from a file
- set default price list on a product

And all of it requires just few simple steps, available directly from Dynamics 365 interface.

Written in HTML 5 it seamlessly integrates with the latest version of the Dynamics 365 2016. Packaged as managed solution is fully compatible with all types of the deployment (on-premises, live). No client or server-side installation needed. This product is licensed per organization.
